

Invoices now chase themselves

Ledgerly 3.8 · May 6, 2026 · Web · Growth and Scale plans

NEW

Ledgerly can now send payment reminders on a schedule you set, so finance teams stop writing follow-up emails by hand. Available on Growth and Scale plans.

What you can do now

- Set up to 3 reminders per invoice (for example 3 days before the due date, on the due date, and 7 days after).
- Reminders stop automatically when the payment is recorded.
- Each reminder uses your invoice branding.

How to use it

- ☐ Open Settings > Reminders.
- ☐ Turn on Automatic reminders.
- ☐ Pick a schedule or add your own.
- ☐ Click Save. The schedule applies to every unpaid invoice.

You asked, we built it

Feature request #412 on the Ledgerly feedback board (230 votes).

Availability

Rolling out to all Growth and Scale accounts by May 20, 2026.

KNOWN LIMITATION

Reminders send in English only. More languages are planned for Q3 2026.
