

What's New in Version 5.12

Trailmate · Released June 2, 2026 · iOS and Android

- Offline maps now download in the background, so you can lock your phone and keep walking.
- New: a pace line on the elevation chart shows where you slowed down on each climb.
- Fixed: your GPS track no longer stops when you open the camera mid-hike.
- Fixed: the Apple Watch app now shows distance in miles when your phone is set to miles.

Thanks for the reports that helped us fix these. Questions? support.trailmate.example

CHARACTER COUNT

The four bullets total 341 of Google Play's 500 characters.
