

Rostra 2.14.1 hotfix

June 18, 2026 · Web, iOS, Android

NO ACTION IS REQUIRED

This hotfix fixes two problems introduced in 2.14.0. The fix is live for every account. No action is required.

Fixed

PROBLEM	NOW
Shift swaps approved in the mobile app did not appear on the web schedule until you refreshed.	Approved swaps now show on the web within 5 seconds.
Overtime alerts fired at 38 hours instead of 40 for accounts whose week starts on Monday.	Alerts now fire at 40 hours, and alerts sent in error have been cleared.

Affected users

Accounts with a Monday week start that used overtime alerts between June 16 and June 18, 2026.

Cause

The week-start setting was read in UTC instead of the account's time zone.

KNOWN ISSUE

CSV exports of shift swaps still show times in UTC. The fix ships in 2.14.2 on June 25, 2026.
