

Parcelo API version 2026-07-01

Released July 1, 2026 · Action required by January 15, 2027

ACTION REQUIRED BY JANUARY 15, 2027

Version 2026-07-01 changes how rates return prices and renames one field. Your integration keeps working on its pinned version until you upgrade. The v1 labels endpoint stops working on January 15, 2027.

Changes

TYPE	CHANGE
BREAKING	GET <code>/rates</code> returns amount as an integer in cents (1299) instead of a decimal string ("12.99").
BREAKING	The <code>carrier</code> field is renamed <code>carrier_code</code> .
NEW (NON-BREAKING)	<code>estimated_delivery</code> (ISO 8601 date) on every rate.
DEPRECATED	POST <code>/v1/labels</code> , sunset January 15, 2027. Use POST <code>/v2/labels</code> instead.

How to upgrade

- ☐ Send the header `Parcelo-Version: 2026-07-01` in a test environment.
- ☐ Divide `amount` by 100 wherever you display prices.
- ☐ Replace `carrier` with `carrier_code`.

☐ Move label calls to `/v2/labels` .

Before and after

BEFORE	AFTER
<pre>{"carrier": "UPS", "amount": "12.99"}</pre>	<pre>{"carrier_code": "ups", "amount": 1299, "estimated_delivery": "2026-07-04"}</pre>
